Investment Intern (m/f)

We are looking for an unpaid intern to support our investment and general operations.

About us: We are a startup investment management firm based in Frankfurt, Germany. The firm was founded by two former private equity managers (Alex and Felix) who thought it would be really fun to launch a fund to apply their PE philosophy to listed equities. Our investment style is fundamental, long-biased, with a typical time horizon of 2-4 years. We really love investing and have a lot of fun during work. Warren Buffet might be tap-dancing to work, which is fine, but we prefer crip-walking.

You:

- ...are really awesome, but also humble
- ...love investing, can't stop learning more about it and read up a lot on it
- ...are good with both numbers and people
- ...are available for 2 – 4 months
- ...can think for yourself and hate not being able to solve a problem
- ...have completed prior internships in investment banking, consulting, and/or investment management
- ...are comfortable wearing a T-shirt to work

You will have the opportunity to experience the DNA of a boutique investment management firm. You will be working closely alongside the founding partners and get a first-hand look at our investment approach. Our aim for your internship is to give you a head-start into fundamental investing and give you confidence in performing your own analysis. You don't need to be old to be right!

Curious? Send your CV to felix@conductioncapital.com. We will get back to you very quickly.
