

Investment Intern (f/m/d)

We are looking for an unpaid intern to support our investment and general operations.

About us: We're a startup investment management firm based in Frankfurt, Germany. The firm was founded by former private equity professionals looking to apply a PE philosophy to listed equities. Our first fund went live on September 2017 under the name „CCA European Opportunities UI“. Our investment style is fundamental, long-biased, with a typical time horizon of 2-4 years. We employ quantitative methods for idea generation and portfolio construction but rely on human analysis including physical site visits for investment decision making. We love the intellectual challenge and endless learning opportunity that the investment business provides. We also don't take ourselves too seriously.

You:

- ...can identify yourself with sustainable and ethical capitalism
- ...are good at things, but also humble
- ...can deal well both with numbers and people
- ...love to learn new things and acquire new mental models
- ...can think for yourself and hate not being able to solve a problem
- ...ideally completed prior internships in investment banking, consulting, and/or investment management
- ...ideally have knowledge in Python, MatLab, or similar tools
- ...are available for 2 – 4 months

It is our goal to give you the greatest learning experience you can possibly have during an internship. You will get a first-hand look at our investment approach. At the end of your internship you will have been equipped with a basic toolbox for fundamental investing and the confidence to perform your own analysis.

Curious? Send your CV to felix@conductioncapital.com. We will get back to you very quickly.
